CARPENTRY SHOP

We start with beech wood cut into pieces.

Chamfering, milling, rounding, edge chamfering, drilling holes etc.

We do all these works ourselves, using advanced carpentry machines.

In many processes, proprietary machines tailored to our needs.

OUR PRINTING HOUSE

We carry out the entire printing process on site. Starting from the visualization, color selection in accordance with the Pantone pattern, to printing on the material. Our graphic designers help in the proper preparation of the project.

OUR SEWING ROOM

In order to shorten the time of order fulfillment, we sew our products on site. It also gives us flexibility for unusual orders and the possibility of developing new products in accordance with the current needs of the customer.

For larger orders, we cooperate with large sewing rooms.

OUR PRINTING HOUSE

The basic printing technique used in our activity is dye-sublimation printing. We print from roll, on certified fabrics, therefore our prints are characterized by:

- Unlimited print length and a wide selection of fabrics.
- Resistance to changing weather conditions, abrasion, washing, ironing.
- Not noticeable to the touch or smell, printout.
